QUALITY ORTHODONTICS FOR ADULTS AND CHILDREN ***LATEST ADVANCES IN ORTHODONTIC TREATMENT***

Preventative (Ages 3-7)

This treatment is designed to prevent orthodontic problems when patient is in primary dentition stage.

Interceptive (Ages 7-11)

This treatment is suited for the patients in which malocclusion is developing. The treatment restores normal occlusion and guides eruption of permanent dentition (also called first phase).

Corrective (Ages 10 - up)

This treatment corrects malocclusions that have already occurred, focusing on facial esthetics, dental esthetics, and occlusion.

Surgical (Late teens/adults)

This treatment modality corrects malocclusions, skeletal deformities and facial imbalance with the aid of orthodontics and orthognathic surgery.
